

VU receives free shipping on BD research reagents ordered through Fisher Scientific in eProcurement, your one-stop shop for high quality research reagents.

Q: What products are available through the new partnership?

A: Now available through Fisher Scientific are:

Research Use Only (RUO) and RUO(GMP) reagents, which include the following brands: -

BD Pharmingen - BD Phosflow - BD Cytometric Bead Array (CBA) - BD OptEIA - BD ELISPOT - BD Transduction Laboratories

Product Categories Research Reagents, Antibodies and Buffers, Second Step Reagents, Immunoassays, Magnetic Cell Separation Reagents, Cell-Based Assays, Bioimaging Reagents, Protein Expression

Key Applications Flow cytometry, Western blotting, immunofluorescence/microscopy, ELISA, ELISPOT, Bead-based immunoassays, magnetic cell separation

Focus Areas Immunology, Cell Signaling, Cytokine Analysis, Stem Cell Research, Apoptosis, Cell Cycle and Proliferation

NOTE: Custom products will not be available through the Fisher Scientific sales channel.

Q: Will my current ordering processes change?

A: Using Fisher's "punch-out" website will save you time in placing your order and money with free delivery. If you order direct through BD Pharmingen, shipping fees will be charged.

Q: What part numbers do I use?

A: The Fisher Scientific part numbers will show "BDB" listed before familiar part numbers. For example:
BD part number 555555
Fisher Scientific equivalent material number BDB555555

Q: How will product or technical issues be handled?

A: BD technical service will continue to handle all technical issues directly.

Q: Are Reagent Rentals or other contracts affected?

A: To receive credit against an existing contract, you must continue to order directly from BD Pharmingen using your existing contract account numbers. An order through Fisher Scientific will not receive contract credit.
